## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed May 05, 2005 have been fully considered but they are not persuasive.

2. Regarding Miller, Miller teaches that a "... control link connects the automatic equalizers 20a and 20b for arbitrating and/or **synchronizing** the testing frequency generation and **response analysis**...." (emphasis added). Miller teaches that the response analysis is an analysis of the frequency spectrum (Col. 2, lines 33-39).

Therefore it is inherent that synchronizing the response analysis must include a step of informing either channel that feedback is detected. The limitation that the other channel **may continue** is irrelevant, because the phrase imposes no limitation whether or not that the channel continues. It either continues or it does not.

Miller also teaches that the multiband gain control unit is **any device** that can be automatically controlled to vary the gain of a selected audio band, and Miller teaches in one embodiment that the bands are  $\frac{1}{2}$  to 1 octave wide spaced  $\frac{1}{3}$  an octave apart (Col. 4, lines 21-46). These widths cover 6 to 12 semitones and are spaced every 4 semitones in a western musical scale, and typical notch filters are usually a few to several semitones wide. The fact that Miller teaches that the multiband control unit can be any device that would have these desirable features, it is inherent that the multiband control unit can be 31 notch filters, which would be automatically controlled.

3. Regarding the 35 USC 103 rejection using the combination of Miller and Jaeger, see the above response. Miller teaches a synchronization of a response analysis,

Art Unit: 2644

wherein it is inherent that the multichannel system shares detection information to synchronize an analysis. Jaeger teaches that filter parameters are shared to preserve a stereo image. The office maintains that the combination for the purpose of preserving a stereo image would be obvious.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
